

Environmental and Product Policy

Updated Version 2025-05-26

Environmental and product policy for Expertus Kemiteknik AB 2020

Our environmental and product policy aims to achieve the least possible environmental impact in the manufacturing process and the delivery of our high quality products through continuous improvements.

We will continuously identify our significant environmental aspects and formulate environmental goals in order to minimize our environmental impact:

- we shall, together with relevant experts, maintain knowledge of key environmental issues in order to fulfill demands from authorities, laws and regulations
- we will manage waste and residues in compliance with local and national regulations and also provide appropriate guidance to our customers.

We strive to continuously improve our direct and indirect environmental impact. Our efforts include

- to reduce energy consumption and emissions
- to ensure that our purchases are made according to 'Bra Miljöval' (Good Environmental Choice)
- to evaluate suppliers and transports in terms of their environmental impact
- to reduce waste and overconsumption of consumables and raw materials by adapting our production facilities for maximum efficiency
- to ensure that our employees have knowledge of the company's environmental goals.

We strive to ensure a high and steady quality of our products by

- making all production steps traceable so that deviations can be identified and remedied
- continuously following customer and user satisfaction as well as product functionality to find opportunities for product improvements and new products.
